

FullCoverage: Comprehensive Protection for your Solar Power System.

powering a better tomorrow

FullCoverage: Simply twice the guarantee.

As a Solarwatt system owner you are protected on two levels: your investment in a solar power system is solidly protecting your energy future, and Solarwatt's unique insurance and warranties which protects the entire PV system will ensure you sleep soundly.

FullCoverage secures your energy independence. You are protected in case your solar power system is damaged or delivers less power than expected. It also covers theft and weather damage and is available on your entire PV system. That means modules, inverters, storage units* and wallboxes.

All-risk Insurance

If your system is damaged or needs to be replaced, FullCoverage will cover all repair or replacement costs. Not just for replacement parts, but also any craftsman and installation expenses. The compensation is paid in full - without deduction of any residual values and covers additional costs of replacement due to technological progress and price increase. If a costly expert opinion is required to determine the material damage, this will also be compensated in the event of proof of damage.

FullCoverage covers damage in the event of**:

- ✓ Mechanical and electrical incidents, such as overcurrent, overvoltage and short circuits
- ✓ Weather-related incidents such as frost, hail, lightning, snow pressure, fire and water as well as theft or looting, operator errors, carelessness and animal bites

FullCoverage covers your roof installations up to 1.000 kWp including:

- ✓ Modules
- ✓ Mounting system
- ✓ Manager flex
- ✓ Storage system
- ✓ Wallbox
- ✓ Technical peripherals

Downtime insurance: Make up for hours of sunshine missed.

If your system is stolen or damaged, until it is replaced you would also lose out on the electricity that could have been generated. FullCoverage pays you back for that lost power, from the third day - up to one year. There is no downside!

2 €/kWp

days lost

April to September

1 €/kWp

days lost

October to March

Low Yield Insurance: Bad weather? No worries.

What about years of below-average sun? If 90 % of the annual energy yield predicted in the output forecast is not generated due to lower solar irradiation, then you will benefit from the minimum earnings insurance included in FullCoverage.

In such a case, the insurance will cover the difference between guaranteed annual output and the actual output. This means up to 50 % of the forecasted annual energy output!***

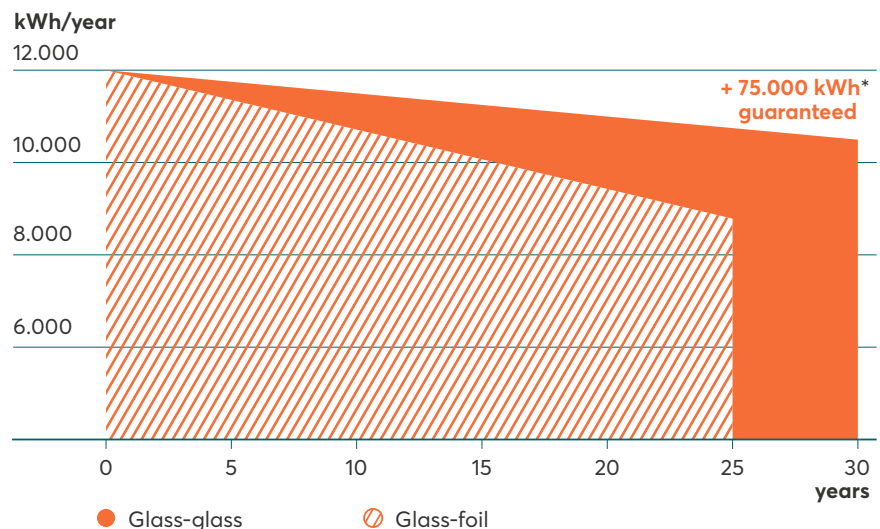

* Only storage systems purchased via Solarwatt are insured.

** Excess of 250€/case; *** Compensation is calculated from the first day of malfunction up to maximum of one year.

We believe in the quality of our products

That is why, we give you market leading product and performance guarantees on all our products.

We guarantee our systems will deliver consistently high returns. Specifically, in the first year we guarantee at least 97 % of the measured minimum output. In the 29 following years, output will not decrease by more than 0.35 % per year. In the 30th year the yield must still be at least 87 %. Otherwise, we will reimburse you for the missing income.

* based on a 10 kWp system, on a south-facing roof at a 30° angle in Munich (Germany), for a 4-person household with a heat pump and electric vehicle charger. Calculation via PV Sol.

Good to know

Solarwatt pays your FullCoverage premiums for the first five years (excluding glass-foil modules). FullCoverage is automatically included for Battery flex and ensures smooth operation and damage protection for 5 years.

FullCoverage is included for glass-glass modules and is available for purchase on glass-foil modules.

Online activation

FullCoverage becomes valid as soon as you activate it online. For more information, ask your installer! They are familiar with all the insured components and will help you through the online registration at solarwatt.com.

We will put everything right again in the event of damage or loss. Yes, everything!

*This brochure is for information purposes only. The only information which is definitive is the information you received together with your insurance certificate relating to insurance coverage, customer information and instructions on the correct procedure in the event of loss or damage.

Go solar with
Solarwatt.

Be part of a greener future.

We want to make it as easy as possible for you to be part of a positive change in the way we generate energy. No matter whether you'd like a general and no-obligation chat or have specific questions, we'd be happy to talk. We look forward to your call or email.
